Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 8 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamada et al. (US 6,614,912 B1, hereinafter “Yamada”).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claims 8 and 12, Yamada discloses a transmitting/receiving method (Figures 6 and 7) for modulating and transmitting an analog audio input signal (via transmission circuit 42 and LED 43; col. 8, line 62 – col. 9, line 4) and for receiving said transmitted signal (via photosensor 44 and reception circuit 45; col. 9, lines 5-8), demodulating said signal (decoder circuit 46 separates the received signal S41 into the original 2-channel audio signals SL5 and SR5; col. 9, lines 8-10), and outputting said analog signal (audio signals are output to headphone

acoustic units 8L and 8R; col. 9, lines 10-16), wherein a digital signal obtained by digitizing said analog input signal (via A/D converter circuits 21-24; col. 4, lines 34-36) is delayed (via time difference circuits 56 L and 56 R which are constructed by a variable delay circuit; col. 9, lines 11-20, 43-49).

***Allowable Subject Matter***

3. Claims 1-7, 9-11 are allowed.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamada et al. (US 6,021,205), Lee, and Mershon show other headphone units which receive processed audio signals.
